E-Commerce Manual & Functional Testing — SauceDemo / Swag Labs

Application	SauceDemo / Swag Labs
Test Cases	85
Failed Test Cases	8
Jira Defects	8
Testing	Manual & Functional Testing

This document contains only the eight actual Jira defects identified during Project 1 execution.

SCRUM-5 — Login fails when valid username contains leading or trailing spaces

Test Case ID	TC-008
Precondition	User is on SauceDemo login page.
Steps to Reproduce	1. Enter a valid username with leading/trailing spaces. 2. Enter the valid password. 3. Click Login.
Test Data	Username with visible spaces around the valid username; valid password.
Actual Result	Login fails with "Username and password do not match."
Expected Result	System should handle leading/trailing spaces appropriately and allow login with valid credentials.
Test Result	FAIL
Labels	authentication, functional-testing, login

SCRUM-7 — Fleece Jacket item not found for problem_user

Test Case ID	TC-055
Precondition	User is logged in with problem_user.
Steps to Reproduce	1. Log in using problem_user. 2. Navigate to Products. 3. Locate Fleece Jacket. 4. Click Add to Cart.
Test Data	Username: problem_user; Product: Fleece Jacket
Actual Result	"Item not found" is displayed and Fleece Jacket is not added.
Expected Result	Fleece Jacket should be added successfully.
Test Result	FAIL
Labels	cart, product, functional-testing

SCRUM-9 — Remove functionality fails for problem_user

Test Case ID	TC-056
Precondition	User is logged in with problem_user.
Steps to Reproduce	1. Log in with problem_user. 2. Add a product to the cart. 3. Click Remove.
Test Data	Username: problem_user
Actual Result	The added product is not removed from the cart.
Expected Result	The added product should be removed successfully.
Test Result	FAIL
Labels	cart, problem-user

SCRUM-10 — Add to Cart fails with JavaScript error for error_user

Test Case ID	TC-057
Precondition	User is logged in with error_user.
Steps to Reproduce	1. Log in with error_user. 2. Navigate to Products. 3. Click Add to Cart.
Test Data	Username: error_user
Actual Result	A JavaScript error/exception occurs and the product is not added.
Expected Result	The product should be added successfully without an error.
Test Result	FAIL
Labels	cart, error-user, functional-testing

SCRUM-11 — Checkout is allowed with an empty cart

Test Case ID	TC-062
Precondition	User is logged in and the cart is empty.
Steps to Reproduce	1. Log in. 2. Ensure the cart is empty. 3. Go to Cart. 4. Click Checkout.
Test Data	Cart: empty
Actual Result	The application allows checkout with an empty cart.
Expected Result	The application should prevent checkout or display a warning.
Test Result	FAIL
Labels	checkout, cart, functional-testing

SCRUM-12 — Whitespace-only shipping information is accepted

Test Case ID	TC-071
Precondition	User is logged in and on the Checkout Information page.
Steps to Reproduce	1. Enter whitespace-only First Name. 2. Enter whitespace-only Last Name. 3. Enter whitespace-only Postal Code. 4. Click Continue.
Test Data	First Name: whitespace only; Last Name: whitespace only; Postal Code: whitespace only
Actual Result	The whitespace-only values are accepted and the application proceeds.
Expected Result	The application should reject whitespace-only values and display validation messages.
Test Result	FAIL
Labels	checkout, validation, functional-testing

SCRUM-13 — Last Name is automatically locked for problem_user

Test Case ID	TC-072
Precondition	User is logged in with problem_user and is on Checkout Information.
Steps to Reproduce	1. Log in with problem_user. 2. Navigate to Checkout Information. 3. Enter/observe the Last Name field.
Test Data	Username: problem_user
Actual Result	The Last Name field is automatically locked/overwritten.
Expected Result	The Last Name field should allow normal entry and editing.
Test Result	FAIL
Labels	checkout, problem-user, functional-testing

SCRUM-14 — Order placement fails with JavaScript error for error_user

Test Case ID	TC-085
Precondition	User is logged in with error_user and is on Checkout Overview.
Steps to Reproduce	1. Log in with error_user. 2. Add the required products. 3. Proceed to Checkout Overview. 4. Click Finish.
Test Data	Username: error_user
Actual Result	A JavaScript error/exception occurs and the order is not placed.
Expected Result	The order should be placed successfully.
Test Result	FAIL
Labels	checkout, order, error-user
